

## High Rotational Speed Double Row Cylindrical Roller Bearing for Industrial Machinery in Steel Industry

Our Product Introduction

### Basic Information

- Place of Origin: CHINA
- Brand Name: ZHUOLI
- Certification: ISO9001
- Model Number: RKS. 062.20.0414

### Product Specification

- Size: Customizable
- Application: Slewing
- Corrosion Resistance: Yes
- Operating Temperature: -40°C To 80°C
- Load Capacity: High
- Precision: High
- Material: Steel
- Warranty: 1 Year
- Highlight: **double row cylindrical roller bearing,  
industrial machinery roller bearing,  
steel industry roller bearing**

Product Description:

The Single Row Slewing Bearing is a high-quality product designed for various applications requiring precise slewing movements. It is suitable for use in excavators, cranes, wind turbines, and other heavy equipment that require smooth and efficient rotation. Trademarked as Neutral/OEM/According To Customized, this Slewing Bearing is a versatile solution that can be tailored to meet specific requirements. Whether you need a standard configuration or a customized design, this product offers the flexibility to adapt to different needs.

Equipped with Grease lubrication, the Single Row Slewing Bearing ensures smooth operation and reduced maintenance requirements. The efficient lubrication system helps prolong the bearing's service life and provides reliable performance under heavy loads and harsh conditions.

With a high Load Capacity, this Slewing Bearing is capable of handling heavy loads and providing stable support for rotational movements. Whether used in excavator slewing ring bearings, dual axis slew drives, or ceramic sliding bearings, this product delivers consistent performance and durability.

Designed for Slewing applications, this Single Row Slewing Bearing is an essential component for machinery that requires precise rotation and positioning. Its robust construction and high load capacity make it ideal for demanding environments where reliability and performance are critical.

Features:

Product Name: Single Row Slewing Bearing  
Load Capacity: High  
Application: Slewing  
Operating Temperature: -40°C To 80°C  
Trademark: Neutral/OEM/According To Customized  
Corrosion Resistance: Yes

Technical Parameters:

Operating Temperature	-40°C To 80°C
Type	Single Row
Corrosion Resistance	Yes
Warranty	1 Year
Rotational Speed	High
Mounting Type	Bolted
Trademark	Neutral/OEM/According To Customized
Bearing Type	Slewing Bearing
Application	Slewing
Lubrication	Grease

Applications:

ZHUOLI.RKS.062.20.0414 Single Row Slewing Bearing is a high-quality product designed for various applications in the industrial and construction sectors. Made in CHINA, this slewing bearing is certified with ISO9001, ensuring its reliability and performance. With a warranty of 1 year, customers can trust in the durability of this product.

The ZHUOLI RKS. 062.20.0414 Slewing Bearing is specifically suitable for Excavator Slewing Bearing applications, providing smooth and efficient rotation for excavator machinery. Its sealed design ensures protection from external elements, enhancing its longevity and performance. The use of grease lubrication further contributes to the smooth operation of this bearing.

Whether it's for new installations or replacements, the ZHUOLI RKS. 062.20.0414 Single Row Slewing Bearing is ideal for Excavator Slewing Ring Bearing setups. The bolted mounting type simplifies the installation process, making it convenient for various machinery configurations.

This slewing bearing can also be utilized in other industrial settings that require a reliable and durable bearing solution. Its design and construction make it suitable for applications that demand precision and efficiency, such as Ceramic Sliding Bearing setups.

In summary, the ZHUOLI RKS. 062.20.0414 Single Row Slewing Bearing is a versatile and high-performing product that meets the demands of Excavator Slewing Bearing, Ceramic Sliding Bearing, and Excavator Slewing Ring Bearing applications. Its CHINA origin, ISO9001 certification, and sealed, greased design make it a top choice for industries seeking a dependable bearing solution.

Support and Services:

Our Product Technical Support and Services for the Single Row Slewing Bearing include:

- Expert guidance on installation and maintenance procedures
- Troubleshooting assistance for any operational issues

- Recommendations for optimal use and performance enhancement
- Access to technical documentation and resources
- Training programs for users to maximize the benefits of the product
