

Transport Packaging BOX Excavator Slewing Bearing with Heat Treatment and Four Point Contact Ball Type

Our Product Introduction

For more products please visit us on bearingslewingring.com

Basic Information

- Place of Origin: China
- Brand Name: KATO
- Certification: ISO9001
- Model Number: 566-52-11461 HD405-6

Product Specification

- Color: Request
- Usage: Used In Excavator Machinery
- After Warranty Services: Spare Parts
- Weight: /kg
- Surface Treatment: Heat Treatment
- Marketing Type: Ordinary Product
- Transport Packaging: BOX
- Product Number: YN40F00026F1
- Highlight: **Excavator slewing bearing with heat treatment,
Four point contact ball slewing bearing,
Transport packaging box for excavator bearing**

Product Description

Product Description:

Our Excavator Slewing Bearing is a critical element in the functionality of excavators, ensuring smooth rotation and movement. It is meticulously crafted to meet the demands of heavy-duty excavation tasks, offering reliability and stability in challenging work environments.

With our product, excavator operators can experience seamless operation and enhanced productivity. The Excavator Slewing Bearing is a key component that contributes to the overall performance and efficiency of the machine, making it an indispensable part of any excavator setup.

One of the standout features of our Excavator Slewing Bearing is its customizable size, allowing for a perfect fit and optimal functionality. We understand that excavators come in various sizes and configurations, which is why we offer tailored solutions to meet specific requirements.

Additionally, our Excavator Slewing Bearing is available in a range of colors, with the option to request a specific color based on individual preferences or branding needs. This customization option adds a personal touch to the excavator setup, enhancing its overall aesthetic appeal.

When it comes to after warranty services, our Excavator Slewing Bearing ensures peace of mind with spare parts availability. We stand behind the quality of our product and offer comprehensive support to ensure continuous operation and minimal downtime for excavator owners.

Furthermore, our OEM service is available for the Excavator Slewing Bearing, providing customers with the opportunity to customize and brand the product according to their specifications. This service underscores our commitment to delivering tailored solutions that meet the unique needs of our clients.

In summary, our Excavator Slewing Bearing is the ideal choice for excavator operators seeking a reliable, efficient, and customizable component for their machines. With its superior performance, durability, and customization options, this product is a valuable addition to any excavator setup, ensuring optimal functionality and productivity.

Technical Parameters:

Size	Customized
Usage	Used In Excavator Machinery
Transport Packaging	BOX
Bearing Type	Four Point Contact Ball Slewing Bearing
Product Number	YN40F00026F1
Marketing Type	Ordinary Product
Material	Steel
Part Name	Slewing Bearing
After Warranty Services	Spare Parts
Oem Service	Available

Applications:

KATO Excavator Slewing Bearing (Model Number: 566-52-11461 HD405-6) is a high-quality product designed for use in excavators. Manufactured in China, this product meets the ISO9001 certification standards, ensuring its reliability and performance.

The slewing bearing is made of durable steel, providing strength and longevity for heavy-duty applications. It comes packaged in a secure BOX for safe transport to its destination.

With its versatile design and compatibility with various KATO excavator models, the slewing bearing is an essential component for Excavator Track roller nut, Excavator Drive Motor, and other Excavator Parts Swing Motor systems.

Whether used in construction, mining, or other industrial applications, this KATO slewing bearing delivers exceptional performance and durability. Its Request color option allows for customization to suit different project requirements.

This Ordinary Product is well-suited for a wide range of application occasions and scenarios. From routine maintenance to major repair projects, the KATO Excavator Slewing Bearing is a reliable choice for professionals in the industry.

Customization:

Product Customization Services for Excavator Slewing Bearing:

Brand Name: KATO

Model Number: 566-52-11461 HD405-6

Place of Origin: China

Certification: ISO9001

OEM Service: Available

Gear Type: External Gear

Part Name: Slewing Bearing

Product Number: YN40F00026F1

Surface Treatment: Heat Treatment

Keywords: Construction Equipment Bearings, Excavator Slewing Ring Bearing, Construction Equipment Bearings

Packing and Shipping:

Product: Excavator Slewing Bearing

Description: High-quality slewing bearing for excavators, designed for smooth rotation and durability.

Packaging:

- The slewing bearing will be securely packed in a sturdy cardboard box to prevent damage during shipping.
- Additional cushioning material will be used to provide extra protection.

Shipping:

- We offer fast and reliable shipping services to ensure prompt delivery of your excavator slewing bearing.
- The product will be shipped using a reputable courier service with tracking information provided.
